

HYDRO GLISS® GEL

TECHNICAL INFORMATION

HYDRO GLISS® GEL is designed to eliminate the friction existing when the plastic pipe must be joined with packing to ring.

HYDRO GLISS® GEL its potential applications to join the pipe with particularly precise diameters of graft, that in presence of packing, would render the graft particularly difficult. Also the external temperature may change the effect of the join.

Appearance: the product is a clear green gel; the water and glycol in the gelatin act as lubricants as well as vehicles for other specific lubricants which act where greater friction would prevent proper cable installation.

In civil installation applications, the product helps prevent **unwanted spilling** of the lubricant on wooden floors, carpets, and in general on any material that is difficult to clean, and help the operator to join the pipe of little and big diameter of dimension.

In industrial applications, it is used for laying and join large-section **pipes** for water by rain and drain.

Use: apply the gel on the pipe that can be joined and install the pipe.

HYDRO GLISS® GEL is a non-toxic, inert, bio-degradable, non-flammable product.

HYDRO GLISS® GEL may also be used on drinking water pipes. Product compliant with current EU regulations

TECHNICAL SPECIFICATIONS

Appearance	clear green gel
Odor	none
Viscosity	approx. 80,000 cp
Specific gravity	gr/cm ³ 1
pH	7 neutral
Use temperature	- 15 - + 50 C°
Toxicity	non-toxic
WGK	1 (according to 2000 German and British standards)

PACKAGING:

Cod VHGE125	Little pipe of 125 ml in box of 12 pieces
Cod VHGE250	Little pipe of 250 ml in box of 50 pieces
Cod VHGE500	Bottle of 500 ml in box of 12 pieces
Cod VHGE1	Bottle of 1 lt in box of 15 pieces
Cod VHGE5	bucket of Kg 5
Cod VHGE20	bucket of Kg 20
Cod VHGE25	bucket of Kg 25
