

## Kit to join the electrical cable by junction box and bi-component silicone gel

Bi-component Silicone Fast cure. On 15 minutes at room temperature the product polymerized. 2-component system that is readily mixed in a 1:1 ratio. The junction box protects the electrical join by water, humidity, dust, grease, oil. The product is transparent so the electrical join is inspected by watch. The product is reaccessible. For small and medium voltage 0,6/1 KV.

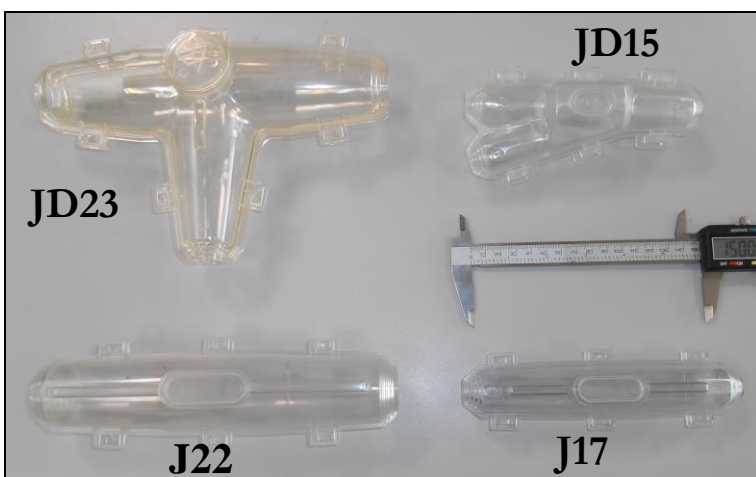

### The kit is composed by:

Instruction

Plastic Junction box  
(available J17, J 22, JD15 JD23)

2-component silicone gel in a single bag with two pockets

### Four different junction box available

**JD23** big derivate at “T” 90°

**JD15** small derivate at “Y” 30°

**J22** big linear

**J17** small linear

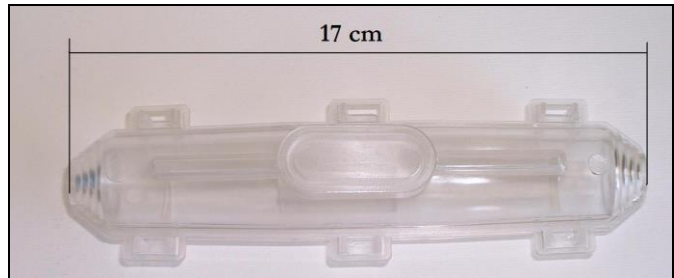

## Junction Box

Cod Art.	Description	Internal Volume size	Max diam cable	Section cable size mm <sup>2</sup>
J17	length 17 cm 	80 ml	22 mm	1x95 4x16
J22	length 22 cm 	300 ml	37 mm	1x300 3x50 + 25
JD15	Derivate at Y 30° length 15 cm 	80 ml	22 mm	1x70 2x25 3x10 4x6
JD23	Derivate at T 90° length 23 cm 	500 gr	37 mm	4x10, 4x25 (way cable) 4x4 (derivate cable)
